

GREAT WHEN AN APP RUNS, AWESOME WHEN IT DRIVES

SHARE YOUR PASSION IN A TEAM OF FREE THINKERS.

At BMW Car IT, a wholly owned subsidiary of BMW AG, we live and breathe software. We design and implement embedded software for the electronic control units of the BMW cars as well as related tools and frameworks.

Working Student in Applications Testing (m/f/x)

We build Android Apps for Automotive. As a working student, you will be taking part in the testing activities in an agile environment with a strong focus on software quality. You will learn how to operate a test rack, define test cases for Android applications in an automotive context and write scripts to implement automation.

You will gain competence in the automotive domain thanks to the deep integration into the car's electronics and communication infrastructure.

Requirements:

- Bachelor or Master studies in Computer Science, Electronics Engineering or similar
- Knowledge of test automation development and execution (Continuous Integration, automated unit and component testing)
- Familiarity with Python and scripting language in general is beneficial
- Business-fluent English is required

Location: Ulm
